Subject: Request for Meeting with Assistant Administrator Bill Wehrum - Sept 19 or 20

Hi Delaney

The purpose of this message is to request a meeting with Assistant Administrator Wehrum to discuss aircraft emissions issues that are within the jurisdiction of the International Civil Aviation Organization's (ICAO) Environment Committee. OTAQ staff are actively engaged in policy formulation at ICAO as well as in developing domestic implementing regulations. Meeting participants would include representatives from Boeing; General Electric; and the Aerospace Industries Association. Attached below is a draft agenda which

includes specific discussion topics. We are requesting Sept 19 or 20 as potential meeting dates because out of town participants for both companies will already be in DC for an industry meeting earlier in the week. We will work with you to find a convenient time that works for Mr Wehrum on either of those days. You should know that I have already provided background regarding this request to OTAQ (Ben Hengst). Thank you in advance for your assistance and please let me know if any additional information would be helpful to you.

Draft Agenda

1. ICAO Background and Regulatory Policy Development Process
2. Industry Engagement with ICAO and its Environment Committee (CAEP)
3. nvPM
4. NO_x
5. CO₂

Subject: RE: Request for Meeting with Assistant Administrator Bill Wehrum - Sept 19 or 20

Dear Pete

Thanks for this outreach. I did catch up with Ben on this topic, but I would like to discuss with you sometime in the next few weeks. One of the questions I have is more background on the Aerospace Industries Association.

What is this Association, who are typical members, and to what extent are the associations views similar or different to Boeings?

I am in the office on and off this week and next week, but then back full time for the week of August 6, and most of the rest of August.

Do you have some open times the week of August 6 or the week of August 13 where we could schedule a 30 minute call?

Best regards,
Bill

Subject: draft email for Chris to send AA Wehrum regarding FAA senior career staff participating in the aircraft industry meeting on September 20

Chris –

I communicated with Pete Pagano at Boeing regarding FAA's request to have one or two participants from FAA (Kevin Welsh and/or Ralph Iovinelli) participate in the September 20 meeting with AA Wehrum & OTAQ. Pete and the industry are fine with that, and I think it will be helpful for FAA and EPA to hear the industries messages at the same time.

Below is an email you can consider sending to AA Wehrum so he is aware.

Thanks
Bill

OAR Briefing Materials for Acting Administrator Wheeler
October 25, 2018 – American Forest & Paper Association

American Forest & Paper Association (AF&PA)

Attendees: Donna Harman, CEO; Paul Noe, Vice President; Russ Frye, Outside Counsel

Background: AF&PA is the national trade association of the forest products industry whose member companies make more than 75 percent of U.S. pulp, paper, paper-based packaging and wood building materials. Member companies range from independent forest owners and family-owned mills to large multi-product, publicly-owned companies that manufacture pulp, paper, paperboard and wood products.

Topics of Discussion: AF&PA has requested this meeting to discuss the treatment of biogenic CO₂ under the Clean Air Act and request an update as to where the Agency is in implementing the congressional language directing EPA, USDA, and DOE, to establish policies that reflect the carbon neutrality of forest-derived bioenergy.

Ex. 5 Deliberative Process (DP)

On April 23, 2018, EPA Administrator Scott Pruitt issued a statement of policy making clear that in future regulatory actions biomass from managed forests will be treated as carbon neutral when used for energy production at stationary sources. In the Spring and Fall 2018 Regulatory Agenda, the Agency indicated we will be proposing action to establish regulatory provisions for the exemption of certain biogenic CO₂ emission from stationary sources.

Ex. 5 Deliberative Process (DP)

Deliberative Material – Do Not Cite or Quote

OAR Briefing Materials for Acting Administrator Wheeler
October 25, 2018 – Middle Georgia Clean Air Coalition

Middle Georgia Clean Air Coalition (MGCAC)

Attendees: Ray Clark, Consultant for MGCAC, former member of White House Council on Environmental Quality (President Clinton); Mayor Robert Reichert, Macon – Bibb County; Commissioner Daylon Mart, Jones County; Greg Boike, MGCAC.

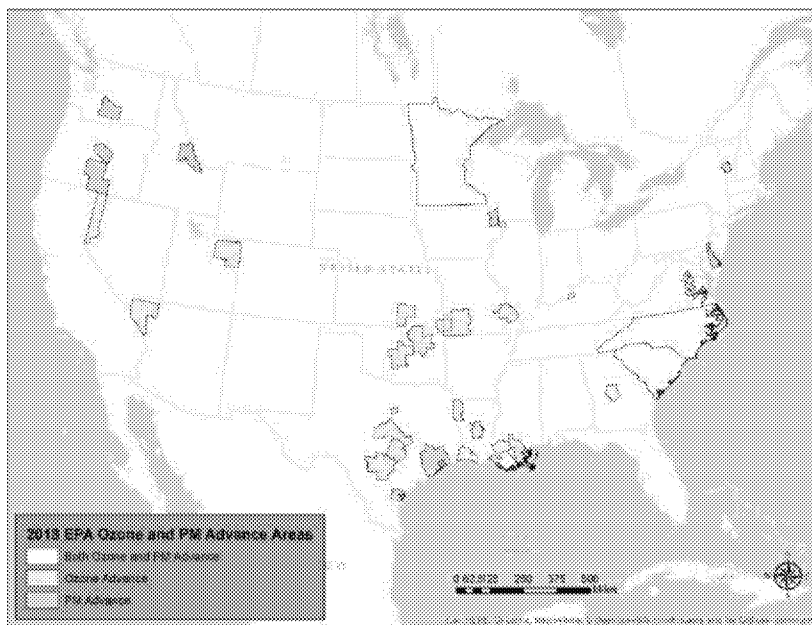

MGCAC Background: The MGCAC has been working for nearly the past 15 years to ensure the people living in the central Georgia region are breathing clean air. The 13 cities and seven counties that make up the MGCAC have accomplished demonstrable and measurable achievements that have made a positive impact on our air quality.

Since adoption in 2015, MGCAC has been a participant in EPA's Ozone and PM_{2.5} Advance Program (more information below). An active partner with Region 4, MGCAC has attended all four of the annual Region 4 Advance Forums (2015-2018), including the most recent Forum on September 11-13, 2018.

MGCAC Counties: Bibb, Crawford, Houston, Jones, Monroe, Peach, Twiggs

No MGCAC county is currently in nonattainment for any NAAQS. Previously, Bibb and Monroe were in nonattainment for the 1997 ozone and 1997 PM-2.5 (both standards have been revoked).

Background on EPA's Advance Program: The Advance Program is a collaborative effort led by EPA to encourage emission reductions in attainment areas and to help states, tribes and local governments continue to meet the National Ambient Air Quality Standards (NAAQS) for ozone and fine particulate matter (PM_{2.5}). The Advance Program is flexible in the sense that participants determine their own goals and the measures they want to implement in order to reach them - EPA does not "approve" or "disapprove" participant commitments. Although there are no guarantees that participation will prevent a nonattainment designation from ever occurring, the actions taken as part of the Advance Program could better position an area to handle nonattainment requirements if they ever apply.

It's aircraft co2. Boeing (Pete Pagano) will also be there. Fed ex has one plane in particular they want to discuss with bill/Otaq. I likely have some more info in email that I'll dig out.

There's also a tote meeting that popped up...which you've probably already seen

On Aug 10, 2018, at 5:29 PM, Cook, Leila <cook.leila@epa.gov> wrote:

Hi Josh,

Today OTAQ received an invite referenced below for Bill W.' meeting with FEDEX on 8/15. There is no information in the appt and at the moment we are not thinking we know what the subject might be. In Bill's public calendar we located another FedEx meeting from 7/25th. We don't know whether they have any relationship. Anything you can pass along would be greatly appreciated.

Chris –

I just saw on AA Wehrum's public calendar the following entry –

Can you, Ben or Lee look at AA Wehrum's internal calendar – maybe the meeting next week on the 15th is related to the meeting AA Wehrum had on July 25 with FedEx.

Thanks
 Bill

Subject: AA Wehrum (& OTAQ) meeting with Federal Express Senior VP & General Counsel Rush O'Keefe on Tuesday, August 15

Dear Chris –

This afternoon you, Ben, Lee and I received an invitation from AA Wehrum for a meeting that AA Wehrum has on Tuesday with Ruch O'Keefe, a Senior VP and General Counsel for FedEx Express.

I don't know what this meeting is about, but I think that perhaps we heard AA Wehrum mention this person's name in the past month or two regarding aircraft – but I just can't remember. I have included Bryan and Mike in case they know anything about Mr. O'Keefe in the context of aircraft and/or ICAO. I have also included Karl and Cheryl – as I know that FedEx is a SmartWay member, so maybe they know Mr. O'Keefe.

In the heavy-duty Phase 1 and Phase 2 rulemaking, the group organized by Pat Quinn, the "Heavy-duty Leadership Group" included Fed Ex, and for that group FedEx was primarily represented by Mitch Jackson, who is a VP for Environmental Affairs and the Chief Sustainability Officer for FedEx Corporation.

That's what I know on this.

Thanks
Bill

Yes, there is a direct conversion. We can multiply everything by 3.16 and convert from $\text{kg}_{\text{fuel_burn}}$ to CO_2

Ben –

I looked at the 9:30 am fuels meeting agenda for today with AA Wehrum. It looks very packed. I won't be on the call today.

If you think that there will be time to ask AA Wehrum and Clint if they would still like a briefing from OTAQ and OGC regarding the Administrator's question (can EPA set a CO2 requirement that FAA can implement equal to the ICAO CO2 standard without doing a standard setting rule under CAA 231), can you please let Bryan know.

Bryan – the fuels meeting will be in C174 from 9:30 – 10:30am. You should probably go there at about 10:15 in case there is time to ask for an update on the aircraft CO2 topic.

Thanks

Bill

Dear Chris and Ben,

Yesterday Boeing and FedEx met with AA Werhum, Principal Deputy AA Anne Idsal, and Deputy AA Clint Woods to discuss the CO2 standard setting rule topic. This meeting was at the industry request. For OTAQ, Brian Manning, Cullen Leggett, John Mueller and Courtney Herbolzheimer. For Boeing and FedEx, the participants were:

- Peter Pagano, Boeing
- John Moloney, Boeing

- Rush O’Keefe, FedEx
- Ralph Carter, FedEx
- Steven Taylor, FedEx

Bryan informed me that Boeing shared with AA Wehrum the same information that Boeing and General Electric shared with Deputy AA Gunasekara on December 7, 2018 (which I participated in).

Hi David,

Yes, it is a direct conversion from fuel burn to CO2 emissions for jet fuel. There are 3.16 kg of CO2 per kg of fuel, and thus, you just multiply aircraft fuel burn (jet fuel) by 3.16 to convert to aircraft CO2 emissions. I hope this information helps.

Thanks,

Bryan

Subject: Report out on yesterday's Boeing/FedEx meeting with AA Wehrum - and next OTAQ steps with AA Wehrum

Dear Chris and Ben,

Yesterday Boeing and FedEx met with AA Werhum, Principal Deputy AA Anne Idsal, and Deputy AA Clint Woods to discuss the CO2 standard setting rule topic. This meeting was at the industry request. For OTAQ, Brian Manning, Cullen Leggett, John Mueller and Courtney Herbolsheimer. For Boeing and FedEx, the participants were:

- Peter Pagano, Boeing
- John Moloney, Boeing
- Rush O'Keefe, FedEx
- Ralph Carter, FedEx
- Steven Taylor, FedEx

Bryan informed me that Boeing shared with AA Wehrum the same information that Boeing and General Electric shared with Deputy AA Gunasekara on December 7, 2018 (which I participated in).

Ben –

I looked at the 9:30 am fuels meeting agenda for today with AA Wehrum. It looks very packed. I won't be on the call today.

If you think that there will be time to ask AA Wehrum and Clint if they would still like a briefing from OTAQ and OGC regarding the Administrator's question (can EPA set a CO2 requirement that FAA can implement equal to the ICAO CO2 standard without doing a standard setting rule under CAA 231), can you please let Bryan know.

Bryan – the fuels meeting will be in C174 from 9:30 – 10:30am. You should probably go there at about 10:15 in case there is time to ask for an update on the aircraft CO2 topic.

Thanks

Bill

Subject: Report out on yesterday's Boeing/FedEx meeting with AA Wehrum - and next OTAQ steps with AA Wehrum

Dear Chris and Ben,

Yesterday Boeing and FedEx met with AA Werhum, Principal Deputy AA Anne Idsal, and Deputy AA Clint Woods to discuss the CO2 standard setting rule topic. This meeting was at the industry request. For OTAQ, Brian Manning, Cullen Leggett, John Mueller and Courtney Herbolsheimer. For Boeing and FedEx, the participants were:

- Peter Pagano, Boeing
- John Moloney, Boeing
- Rush O'Keefe, FedEx
- Ralph Carter, FedEx
- Steven Taylor, FedEx

Bryan informed me that Boeing shared with AA Wehrum the same information that Boeing and General Electric shared with Deputy AA Gunasekara on December 7, 2018 (which I participated in).

Ben –

I looked at the 9:30 am fuels meeting agenda for today with AA Wehrum. It looks very packed. I won't be on the call today.

If you think that there will be time to ask AA Wehrum and Clint if they would still like a briefing from OTAQ and OGC regarding the Administrator's question (can EPA set a CO2 requirement that FAA can implement equal to the ICAO CO2 standard without doing a standard setting rule under CAA 231), can you please let Bryan know.

Bryan – the fuels meeting will be in C174 from 9:30 – 10:30am. You should probably go there at about 10:15 in case there is time to ask for an update on the aircraft CO2 topic.

Thanks

Bill

Subject: RE: Request for Meeting with Assistant Administrator Bill Wehrum - Sept 19 or 20

Hi Julia,

Mike Samulski has always encouraged us to invite the full aviation team for meetings with senior management. I added Bob Giannelli and Jeff Stevens because they are the team's experts in aircraft engine nvPM testing. Bruce Maeroff and David Yen are members of the aviation team who work on a number of the agenda items. David Yen should be on travel for an ICAO working group meeting during the time of this Boeing meeting, and I included him in case his trip does not occur for some reason (although this is not likely). If we need to limit participation, let us know.

Thanks,

Bryan

Subject: Request for Meeting with Assistant Administrator Bill Wehrum - Sept 19 or 20

Hi Delaney

The purpose of this message is to request a meeting with Assistant Administrator Wehrum to discuss aircraft emissions issues that are within the jurisdiction of the International Civil Aviation Organization's (ICAO) Environment Committee. OTAQ staff are actively engaged in policy formulation at ICAO as well as in developing domestic implementing regulations. Meeting participants would include representatives from Boeing; General Electric; and the Aerospace Industries Association. Attached below is a draft agenda which includes specific discussion topics. We are requesting Sept 19 or 20 as potential meeting dates because out of town participants for both companies will already be in DC for an industry meeting earlier in the week. We will work with you to find a convenient time that works for Mr Wehrum on either of those days. You should know that I have already provided background regarding this request to OTAQ (Ben Hengst). Thank you in advance for your assistance and please let me know if any additional information would be helpful to you.

Draft Agenda

1. ICAO Background and Regulatory Policy Development Process
2. Industry Engagement with ICAO and its Environment Committee (CAEP)
3. nvPM
4. NOx
5. CO2

Sincerely,

Peter A. Pagano

Hi Bill,

I did stop by the fuels meeting in C174, which just ended. You were correct that the agenda was packed, and the video hung up quickly after the fuels discussion ended.

Ben –

I looked at the 9:30 am fuels meeting agenda for today with AA Wehrum. It looks very packed. I won't be on the call today.

If you think that there will be time to ask AA Wehrum and Clint if they would still like a briefing from OTAQ and OGC regarding the Administrator's question (can EPA set a CO2 requirement that FAA can implement equal to the ICAO CO2 standard without doing a standard setting rule under CAA 231), can you please let Bryan know.

Bryan – the fuels meeting will be in C174 from 9:30 – 10:30am. You should probably go there at about 10:15 in case there is time to ask for an update on the aircraft CO2 topic.

Thanks

Bill

Dear Chris and Ben,

Yesterday Boeing and FedEx met with AA Werhum, Principal Deputy AA Anne Idsal, and Deputy AA Clint Woods to discuss the CO2 standard setting rule topic. This meeting was at the industry request. For OTAQ, Brian Manning, Cullen Leggett, John Mueller and Courtney Herbolzheimer. For Boeing and FedEx, the participants were:

- Peter Pagano, Boeing
- John Moloney, Boeing
- Rush O'Keefe, FedEx
- Ralph Carter, FedEx
- Steven Taylor, FedEx

Bryan informed me that Boeing shared with AA Wehrum the same information that Boeing and General Electric shared with Deputy AA Gunasekara on December 7, 2018 (which I participated in).

It's aircraft co2. Boeing (Pete Pagano) will also be there. Fed ex has one plane in particular they want to discuss with bill/Otaq. I likely have some more info in email that I'll dig out.

There's also a tote meeting that popped up...which you've probably already seen

Hi Josh,

Today OTAQ received an invite referenced below for Bill W.' meeting with FEDEX on 8/15. There is no information in the appt and at the moment we are not thinking we know what the subject might be. In Bill's public calendar we located another FedEx meeting from 7/25th. We don't know whether they have any relationship. Anything you can pass along would be greatly appreciated.

Chris –

I just saw on AA Wehrum's public calendar the following entry –

Can you, Ben or Lee look at AA Wehrum's internal calendar – maybe the meeting next week on the 15th is related to the meeting AA Wehrum had on July 25 with FedEx.

Thanks
 Bill

Subject: AA Wehrum (& OTAQ) meeting with Federal Express Senior VP & General Counsel Rush O'Keefe on Tuesday, August 15

Dear Chris –

This afternoon you, Ben, Lee and I received an invitation from AA Wehrum for a meeting that AA Wehrum has on Tuesday with Ruch O'Keefe, a Senior VP and General Counsel for FedEx Express.

I don't know what this meeting is about, but I think that perhaps we heard AA Wehrum mention this person's name in the past month or two regarding aircraft – but I just can't remember. I have included Bryan and Mike in case they know anything about Mr. O'Keefe in the context of aircraft and/or ICAO. I have also included Karl and Cheryl – as I know that FedEx is a SmartWay member, so maybe they know Mr. O'Keefe.

In the heavy-duty Phase 1 and Phase 2 rulemaking, the group organized by Pat Quinn, the "Heavy-duty Leadership Group" included Fed Ex, and for that group FedEx was primarily represented by Mitch Jackson, who is a VP for Environmental Affairs and the Chief Sustainability Officer for FedEx Corporation.

That's what I know on this.

Thanks
Bill

Bill,

Here is an updated briefing that includes the comments we received from Chris when we briefed him. We added three slides:

- 1) NOx inventory (slide 11)
- 2) NOx future work (slide 12)
- 3) Exemptions (slide 13)

Also, we still have a placeholder to update slide 10 based on your discussion with Pete Pagano.

Please let me know if you have any comments. I will drop off a paper copy as well.
